

McBerns Odour Filter with Edmonds H100 Fan.

Suits 100mm or 150mm Vents for
grease traps, septic, domestic treatment systems and sewers.

This Filter has a replaceable media section. When filter ceases to be effective a replacement media cartridge is available.

SAFETY ADVICE:

Ensure adequate ventilation when removing filter from pack and installing.

Be careful to avoid contact with contents, or fumes from the filter as they may cause irritation to eyes, skin or breathing passages.

Do not puncture the container or otherwise interfere with the product as this will reduce its effectiveness or produce harmful vapours.

INSTALLATION INSTRUCTIONS:

1. Install as indicated in diagram. Secure fan to filter with SS screws through holes provided.
2. We recommend that filter body be secured to vent pipe with screws or glued.

MAINTENANCE we suggest:

1. Monthly inspection to check physical condition of filter and fan and integrity of the installation.
2. Monthly check for any odour emission. When unacceptable emission is detected, filter cartridges should be replaced. Refer to our installation instructions above for cartridge replacement procedure.
3. If extraction fan is included, the fastening where the fan is attached to the filter should be checked every 6 months to ensure that it is still securely fastened. If need be replace fastenings.
