

McBerns Pty Ltd Pump Boots For

FLYGT® Pumps ABS Discharge Pumps Forres 4" Side Delivery Pumps

The **McBerns Pump Boots** are an innovative polyurethane seal designed to overcome problems facing maintenance staff when the pump bowl and pedestal faces on submersible pumps are worn and will not seal. They are quick, easy and safe to fit, so the pump station isn't shut down for an extended time.

We also recommend fitting the **McBerns Pump Boots** to new pumps before installation to prevent wear before it occurs. This innovation saves time and money and can extend the useful life of worn pumps for many years. So instead of replacing the pump you are only replacing the pump boot.

McBerns FLYGT Discharge Pump Boot for 220mm, 235mm & 285mm Diameter Flange:

- Safe & Easy to install
- Reduced Pump Shut-Down Time
- Used on new pumps can prevent wear & tear
- Durable, made to handle the tough pump station conditions.

McBerns FLYGT 80mm Discharge Pump Model 3085 Type CP

- Quick, easy and safe to fit.
- It makes pump maintenance breeze.
- Designed to fit FLYGT Pump Model 3085 TypeCP

80mm Discharge Model 3085 Type CP : Quick and easy to fit to new or worn pumps.

McBerns ABS Pump Boots

ABS PumpBoots are made to suit 100mm and 150mm Discharge Pumps. PumpBoots are made of tough, durable polyurethane. They have a greater chamfer on the edges which makes them safer and easy to fit.

It gives new life to old worn pumps and extends the life of new pumps, preventing wear before it can effect the pump face.

McBerns PumpBoot for Forrers 4" Side Delivery Pumps

The **Pump Boot** is designed for Forrers 4" side delivery pumps and comes in a kit of 5 boot with thicknesses from 2mm to 10mm to compensate for varying wear factors. The **Boot** replaces the original "O" ring and creates a seal, even when the faces are badly worn.

Initial purchase of a complete kit* is recommended, so that you can have the seal size choices available while you have the pump station out of commission. (*Individual sizes can be purchased separately to replenish your kit.)

This innovation saves time and money and can extend the useful life of these pumps for many years.

The **Pump Boot** comes individually or in a kit of 5 Boots to fit the Forrers 4" side delivery pumps. The seal thickness varies from 2mm through 10mm. The different sizes allow for variations in wear on the pump and pedestal faces.
